

Technical Proficiency Standard

Level 1 Certification

Document Ref: RMTS-L1-2026

1 OVERVIEW

Program Overview

The Roof MRI™ Professional certification is a competency-based credential for individuals who perform diagnostic roof analysis. This standard ensures that all certified personnel possess the technical knowledge and field proficiency required to operate Roof MRI™ equipment and to adhere to established forensic data collection protocols.

2 ACCREDITATION

Professional Competency (Level I)

The Roof MRI™ training program is classified as a **Professional Competency Tier** qualification. This signifies that the holder has:

- Attended formal technical training sessions conducted by Roof MRI™.
- Demonstrated direct access to and mastery of Roof MRI™ diagnostic equipment.
- Proven competency in executing the Roof MRI™ diagnostic framework under simulated or field conditions.

3 REQUIREMENTS

Requirements for Certification

To be recognized as a Roof MRI™ Professional, an individual must meet the following criteria:

Requirement	Details
Training Attendance	100% attendance at the initial Roof MRI™ training course.

Company Affiliation	The individual must be actively employed by a company utilizing Roof MRI™ technology.
Technical Evaluation	Successful completion of a competency evaluation proctored by a Roof MRI™ specialist.

4 ANNUAL RECERTIFICATION Maintenance of Status

The integrity of the Roof MRI™ Professional designation depends on active practice and updated education. To maintain an "Active" status, the following requirements must be met annually:

Employment Verification

The certificate holder's company must annually certify that the individual remains employed and continues to operate in accordance with the company's professional guidelines.

Post-Year One Education

After the first full year of certification, the holder must complete **two (2) 1-hour online accreditation courses** provided by Roof MRI™ to stay current on software updates and diagnostic techniques.

5 RECORDS Official Record Keeping

Roof MRI™ maintains a centralized database of all certified Professionals.

- Verification ID:** Every certificate is issued with a unique alphanumeric ID.
- Audit Trail:** Roof MRI™ keeps records of attendance and competency scores to support the professional standing of the certificate holder and their associated company.
