Welcome to Roof MRI™

Making the right roofing decisions starts with the right information. Roof MRI™ gives you a clear, non-invasive moisture scan, helping you understand your roof's condition without unnecessary tear-offs or guesswork. Our advanced scanning technology delivers accurate data, so you can plan smarter, budget better, and extend the life of your roof. Whether you're a building owner, contractor, or facility manager, Roof MRI™ makes moisture detection simple, reliable, and cost-effective.

➤ THE PROCESS

Roof MRI™ is a non-invasive moisture scanning service that detects hidden water within your roof system—without cutting it open. Using advanced scanning technology, we pinpoint problem areas and provide a clear report to help you make informed decisions about repairs, replacements, or maintenance.

➤ THE MISSION

Our mission is to provide commercial property owners and roofing professionals with clear, actionable moisture scans that simplify decision-making and budgeting for smarter, more cost-effective roof management.

➤ WIN FOR ALL

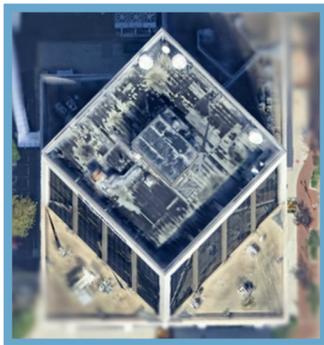

Roof MRI™ benefits everyone—building owners get clarity on their roof's condition, contractors gain a powerful tool to offer better solutions, and insurers see reduced risk. With accurate moisture data, decisions become smarter, budgets become clearer, and unnecessary tear-offs are avoided.

Our Capabilities

➤ MOISTURE DETECTION

From investigative inspections to insurance and warranty claim support, Roof MRI™ provides precise moisture analysis and comparative reports to help you make informed decisions with confidence.

Research

Advancing moisture detection with real-world data, lab testing, and continuous innovation.

Scan

Hands-on training, expert guidance, real-world application, certification, and contractor success.

Non-invasive scans, precise moisture detection, data-driven insights, accurate roof analysis.

Moisture scans that make sense—clear data, actionable insights, smarter decisions.

Client Testimonials

↗

Industry Game Changer

FCA Construction

Al Courcelle
FCA Construction | CEO

Training today on the moisture mapping process was excellent. Adam is highly technical in the application of the equipment and has a very good ability to relay that knowledge to my company. We see this as a game changer in the industry and will allow us to continue to increase our value added services to our customers.

For The Better

White-Herrin Metal

Eric White
White-Herrin Metal | Owner

I have been in the commercial Roofing business for almost 30 years. I have seen a lot of changes over the years have experienced a lot of failures over the years with new products. Rarely in my career, have I seen something that I truly believe can change the landscape for the better in the commercial roofing field. I so appreciate your mantra. Your training and explanations have made me that much better at understanding how to best serve a customer with moisture mapping. Thanks Adam, and yes pun intended “ I’ll be screaming about your process from the rooftops”
